### **DETAILED ACTION**

## Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all

obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the

manner in which the invention was made.

2. Claims 37-38 and 57 are rejected under 35 U.S.C. 103(a) as being unpatentable over

Thomas et al.

In regard to claim 37, Thomas et al. discloses a connector, which comprises a hollow tube 51 having two ends;

a pair of oppositely facing connector means 70, 52 at each end of the tube; and

at least one third connector means 50 on the tube internal of the part of oppositely facing connector means at each end of the tube coaxial with the longitudinal axis, the at least one third connector means 50 having an associated fastening means 30 coaxially interposed between the at least one third connector means and at least one of the oppositely facing connector means at each end of the tube. Thomas et al. does not disclose that the tube is polymeric, however, it would have been obvious to make the tube out of a polymer because the selection of a known material based upon its suitability for the intended use is a design consideration within the skill of the art. In re Leshin, 227 F.2d 197, 125 USPQ 416 (CCPA 1960).

In regard to claim 38, at least one of the pair of oppositely facing connector means and at least one of the third connector means further comprises an end (right end of 51 and cylinder 54),

Application/Control Number: 10/065,594 Page 3

Art Unit: 3679

a sealing surface (52 and 45) adjacent the end, and a shoulder (shoulder on 51 that leads to serrated section 52 and right side of 50) adjacent the sealing surface.

In regard to claim 57, the at least one of the pair of oppositely facing connector means at each end of the tube further comprises an internally threaded connector means 68.

3. Claims 37 and 58 are rejected under 35 U.S.C. 103(a) as being unpatentable over Wilson.

In regard to claim 37, Wilson discloses a connector, which comprises a hollow tube 50 having two ends;

a pair of oppositely facing connector means 29A, 51 at each end of the tube; and at least one third connector means (groove between 28A and next closest flange) on the tube internal of the part of oppositely facing connector means at each end of the tube coaxial with the longitudinal axis, the at least one third connector means having an associated fastening means 20A coaxially interposed between the at least one third connector means and at least one of the oppositely facing connector means at each end of the tube. Wilson does not disclose that the tube is polymeric, however, it would have been obvious to make the tube out of a polymer because the selection of a known material based upon its suitability for the intended use is a design consideration within the skill of the art. In re Leshin, 227 F.2d 197, 125 USPQ 416 (CCPA 1960).

In regard to claim 58, at least one of the pair of oppositely facing connector means at each end of the tube further comprises an externally threaded connector means 29A.

# Allowable Subject Matter

4. Claims 1-36 are allowed.

Application/Control Number: 10/065,594

Art Unit: 3679

5. Claims 39-56 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Page 4

## Response to Arguments

6. Applicant's arguments with respect to claims 37-39, 43 and 57-58 have been considered but are most in view of the new ground(s) of rejection.

#### Conclusion

7. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.

8. Any inquiry concerning this communication or earlier communications from the examiner should be directed to David Bochna whose telephone number is (703) 306-9040. The examiner can normally be reached on 8-5:30 Monday-Thursday and every other Friday.

Application/Control Number: 10/065,594 Page 5

Art Unit: 3679

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Daniel P. Stodola can be reached on (703) 308-2686. The fax phone number for the organization where this application or proceeding is assigned is (703) 872-9306.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is (703) 308-2168.
